DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 14-17, and 22-24, drawn to method for content representation and query formulation, classified in class 707, subclass 4.
 - II. Claims 7, 8-13, and 18-21, drawn to method for word stemming and query refining, classified in class 707, subclass 5.

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions query formulation and input preparation using Latent Semantic method is in itself a method that can be implemented alone on a database as stated in Invention I. While, invention II, states a key phrase extraction algorithm using word stemming it allows you to more easily find similar words which too can be implemented on a database distinctly from invention 1.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2175

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
